# Electronic communication with IncaMail
Secure, traceable and accredited by eGov

SWISS POST

Verifiable communication

Normal e-mails are as easy to read and manipulate as a postcard. IncaMail, a digital mailing service, enables secure and verifiable communication with authorities, companies and citizens – with encryption and in keeping with our times. IncaMail can be used directly from your existing e-mail client or your business software.

IncaMail is officially recognized as a secure delivery platform by the Swiss Federal Department of Justice and Police (FDJP) and is compatible with all mailing platforms approved by the Confederation.

The advantages for you

Easy: Send e-mails with one click from your existing e-mail client or business software.

Secure: E-mail contents are encrypted according to international standards with patented technology.

Traceable: Sending and receipt of IncaMail messages is documented by Swiss Post.

Examples for the use of IncaMail with authorities

– **Regional Employment Center (RAV):** communication with candidates, course providers, etc.
– **Commercial Registry:** mailing of extracts
– **Tax Administration:** mailing of tax assessment notices
– **Courts:** communication with lawyers
– **Office of Personnel:** mailing of payslips
